WORK EXPERIENCE

Monks

Data Scientist

London, UK

Nov 2025 - Present

- Designed and published an internal Python client library (ga_client) orchestrating Genetic Algorithm model workflows on GCP Workflows, with automated Google Cloud Storage file management, real-time progress monitoring, and comprehensive error handling.
- Contributed ongoing feature development and bug fixes to internal applications, including Python version migrations and database transitions.
- Researched and evaluated methodologies for Genetic Algorithm model scoring, investigating statistical and domain-appropriate metrics to assess model quality and convergence

Warner Music Group

London, UK

Digital Analyst, Warner Chappell

Jan 2024 - Nov 2025

- Propagated key data to internal teams by building web pages in Flask Python, communicating with multiple departments to target business needs, and modelling data in a clear and concise manner.
- Built crucial dashboards using SQL and Tableau for higher hierarchy analysis such as contract negotiations on per-play and per-stream minima, market share, and royalties, easing the understanding of the current company's state.
- Self-operated the reception of licensing partner reports from FTP to the Snowflake database with a Python script and bot, allowing the automation of data reception and propagation every month.

The state51 Conspiracy

Digital Operations

London, UK

Oct 2022 - Jan 2024

- Analysed digital supply chain data, tracked partner performance, and identified trends in metadata revisions, infringement issues, and fraudulent stream reports.
- Act as the key point of contact for internal stakeholders regarding the setup and delivery of digital releases, ensuring high-quality data and assets consistently.
- Oversaw partners imports/exports thanks to knowledge of digital supply chain's standard. Assisting with the delivery of products and handling continuous updates, such as metadata revisions and requests for remapping artist profiles.

- Decreased compliance issues by 50% by taking responsibility for partners' onboarding, tracking infringement issues, analysing service watchlists, and automating fraudulent stream reports.
- Kept in touch with external supply chain partners on a technical level, developing a responsive and coherent network, especially about DDEX, XML, and Apple XML standards.

EDUCATION

University of York

MSc Computer Science with AI

Mar 2025 - Mar 2027

PROJECT EXPERIENCE

Monks

- Owned a data product end-to-end: defined data architecture and schema design, built the output dashboard, and delivered a sold commercial product; spanning from infrastructure decisions through to client-facing delivery

Warner Music Group

- Cleansed and set out key data to assist the finance team in contractual tariff negotiation with major DSPs and creation of self-refreshed dashboards in Tableau to visualise how current tariffs affect revenues at any usage period.

The state51 Conspiracy

- Automated physical reporting processes using the company's data structure and Python.
- Led catalogue registration, claims, and sales reporting to collecting societies such as PPL, PRS, MCPS, etc.
- Successful marketing campaigns by implementing data-driven strategies to identify target markets and customer segments, leading to a 30% increase in streams and revenues by investigating API's statistics and royalties report.

SKILLS

Computer-savvy: Python, SQL, Excel, Word, Graph QL, Scikit-learn, Genetic Algorithms, model evaluation & scoring

Language: French, English

Interest: Volunteer, War Child, London (2022) | Paid Help, BIMM London (2021) | Volunteer, GetAhead Festival, London (2021) | Volunteer, DIY Alive Festival, London (2021)
